

Sustainable Intensification

Tuesday 1st March

**FOOD FUTURES
PUBLIC PANEL**

Restricted external

WELCOME AND INTRODUCTION

The OPM Group – an independent research and engagement organisation

Commissioned by the Global Food Security programme to manage a panel made up of 600 people from across the UK

Exploring the topic of global food security and the related challenges and potential solutions in the UK

We want to find out about your views on **sustainable intensification**

The findings will inform the funding priorities, policies and future plans of the Global Food Security programme

WHO IS IN THE ROOM?

You!

A cross section of panel members

Here to share your views.

GFS and Sciencewise

- Eva Kougioumoutzi
- Suzannah Lansdell

Our funders, here to listen and learn

OPM Group

- Lucy
- Ilina

Here to guide and support your discussions

Specialists

Dave Hughes, Syngenta

Tim Williams, Farming Futures

Sam Durham, NFU

Tara Garnett, Oxford University

Here to share their perspectives

TODAY'S AGENDA

Time	Session
6.30 – 6.45	Introductions
6.45 – 7.20	How can SI contribute to global food security?
7.20 -7.50	How could SI be developed in the UK?
7.50 – 8.00	Thanks and close

GROUND RULES

- Respect other people's views
- Make sure everyone has a chance to contribute
- Be careful not to interrupt when someone else is talking
- Please switch off mobile phones or turn to silent
- Ask questions when something is not clear - you'll be doing someone else a favour
- There are no silly questions or wrong answers
- Take a break if you need to

FOOD FUTURES – THE SUSTAINABLE INTENSIFICATION PROJECT

Interviews: 12 panel members, 12 specialists

Survey: 100 panel members

Discussion groups: today, and Thursday (online)

What we want to understand:

- What do you think about sustainable intensification as a response to global food security?
- What kind of trade-offs are acceptable to achieve sustainable intensification?
- Who do you think is, and should be, responsible for sustainable intensification?
- How are your preferences reflected in the food choices you make?

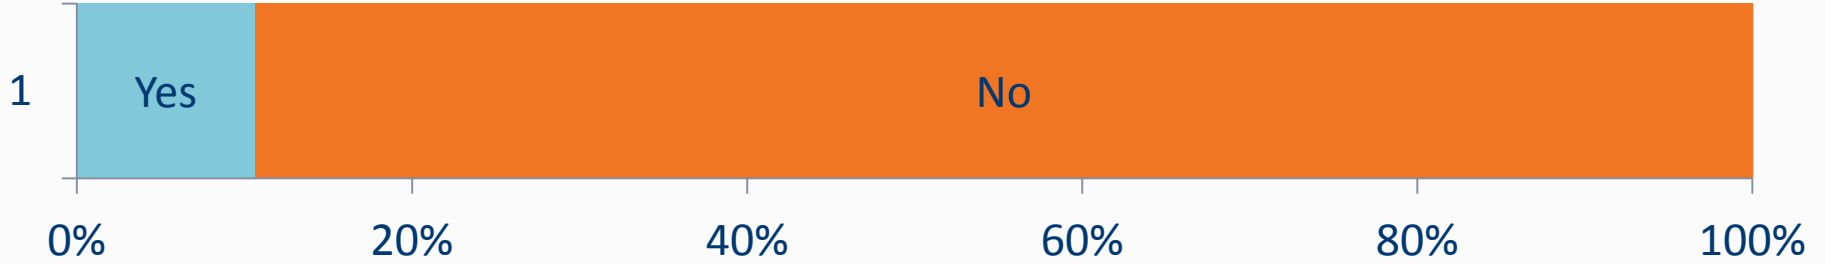

WHAT IS SUSTAINABLE INTENSIFICATION

“Sustainably increasing the production of food, combined with improved resource use efficiency and better environmental outcomes.”

- Changing the crops we grow
- Changing the way we farm
- Changing land use

HOW FAMILIAR IS THE TOPIC?

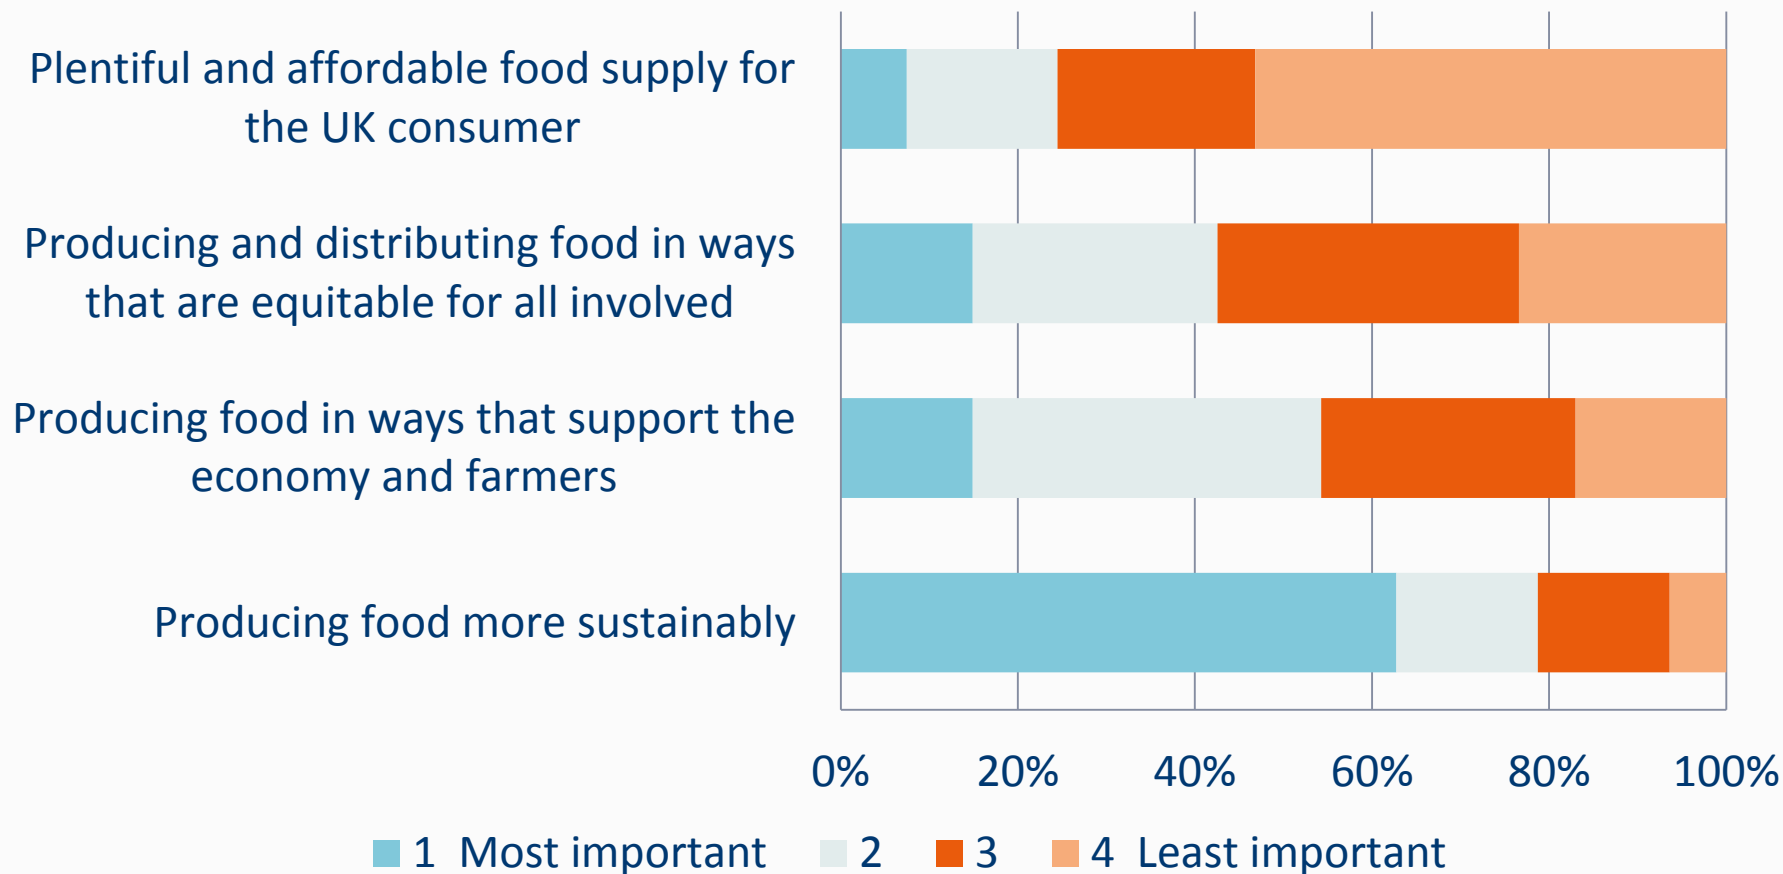

Have you heard of sustainable intensification before taking part?

What's your initial reaction to sustainable intensification

Which of these factors are most important in food production?

TRADE-OFFS: CHANGING THE CROPS WE GROW

Would you be prepared to change your diet to eat food that is more efficient to produce?

Should we use scientifically developed crop varieties to increase food production?

TRADE-OFFS: LAND USE

Should we
inc

Should we use s
intensively so o
preserved?

Mainly agree

Depends

Mainly disagree

TRADEOFFS: CHANGES TO FARMING

Should we accept lower animal welfare standards in order to reduce environmental impacts?

Should farmers use new technology to increase efficiency?

Mainly agree

Depends

Mainly disagree

Thank you
